■ OmniGen-NIM Clinical Genomic Dossier

Enterprise-Grade Variant Pathogenicity & Structural Stability Report

1. Variant Summary & Structural Metrics

Parameter	Value
Gene Symbol	TP53
UniProt ID	P04637
HGVS Notation	c.32972385C>A
Residue Position	32972385
AlphaFold pLDDT Score	None
Estimated ΔΔG (kcal/mol)	1.51 kcal/mol
Stability Classification	Moderately Destabilizing
Analysis Persona	Automated Enterprise Batch Processor

2. Clinical & Structural Interpretation

The variant **c.32972385C>A** in gene **TP53** was analyzed under the active structural context. The predicted folding free energy change (ΔΔG) of **1.51 kcal/mol** indicates **Moderately Destabilizing** structural stability, supported by an AlphaFold pLDDT confidence score of **None**.
