■ OmniGen-NIM Genomic Variant Report Dossier

RESEARCH PROTOTYPE — FOR RESEARCH USE ONLY. Variant Pathogenicity & Estimated Structural Stability Report

1. Variant Summary & Structural Metrics

Parameter	Value
Gene Symbol	BRAF
UniProt ID	P15056
HGVS Notation	c.89624390C>T
Residue Position	89624390
AlphaFold pLDDT Score	None
Estimated ΔΔG (kcal/mol)	1.14 kcal/mol (heuristic estimate)
Stability Classification	Moderately Destabilizing
Burial Analysis	Contact-Count Proxy Evaluated
Analysis Persona	Automated Enterprise Batch Processor

2. Structural & Research Interpretation

The variant **c.89624390C>T** in gene **BRAF** was analyzed under the active structural context. The predicted folding free energy change estimate (ΔΔG) of **1.14 kcal/mol** indicates **Moderately Destabilizing** structural stability, supported by an AlphaFold pLDDT confidence score of **None**.

4. Tamper-Evident Compliance & Audit Trail

This analysis session was monitored under cryptographic chain validation. **Ledger Head Hash (SHA-256):**
`294802bd3d238047b00b5dee98fcb7b09946e7f97af90c2a6b4c1b69d1a43d31`
Verified via OmniGen-NIM tamper-evident audit logging.
